2. Use only images that are public domain/stock photos that you have access to, or risk infringing on copyrights.
3. Search for such images online, <http://www.flickr.com/creativecommons/> is a good place to start. Google Images also has a way to filter for unlicensed photos. After viewing the results, click on the SEARCH TOOLS link next to NEWS and MORE and select USAGE RIGHTS. Select any image except for those that appear under the Not Filtered By License setting.
